- 22 DATA MODUL worldwide

Specialized in the gaming market, we are your global leading supplier for innovative visual solutions

We are passionate about being a reliable and high-quality partner for the latest technology in professional display and interactive systems. The focus is always on our customers and their success.

From special-format displays to state-of-the-art embedded boards, innovative touch solutions to individual lighting as well as housing concepts: The customization possibilities for your gaming application are almost limitless.

As an experienced partner, we support you in your gaming product development from design through production.

Small Sizes

- Full & semi custom designs
- Touch & non-touch solutions
- Slim border design
- Integrated lighting optionally
- Optical bonding technology

Closed / Open Frame Monitors

Our Monitor Solutions for Small Sizes from FHD up to 4k

Discover a world of opportunities with our monitor solutions specifically designed for small sizes. From slot machines to ETG (electronic table games) and kiosks, our monitors excel across diverse applications. Your success is our priority, and our team is here to assist you in finding the perfect monitor solution that aligns with your requirements.

PRODUCTION

From the initial idea to series production, we stand by our customers' side...

... and accompany every step until the final product realization and beyond. In addition to our expert advice in the areas of display, touch, embedded and systems, we offer individual project management and develop solutions together with our customers that are optimally tailored to the requirements of the respective gaming application. Based on that, we attach particular importance to profound quality management: From product pre-tests in our climate and EMC chambers to documentation, test reports and certifications, we offer full support. Thus, we ensure a fast, efficient and sustainable realization of every project.

Modular Product Portfolio – Our core competences combined in a unique product

Systems

- › Open frame, rackmount monitors & Panel PCs
- › Modular concepts up to OEM solutions
- › IP protection class
- › Customized housing & design solutions
- › Software customization & GUI design

Embedded

- › x86 & ARM based embedded solutions
- › Extensive embedded distribution portfolio
- › COM, SBC & carrier boards
- › eMotion LCD controller boards
- › Software development

Display

- › TFT, OLED, LED, MIP, E-Paper, FALD etc.
- › Extensive display distribution portfolio
- › Diagonals from below 1" up to 110"
- › Different form factors
- › Fully & semi customized displays

Touch

- › Resistive, PCAP, Infrared & SAW
- › Inhouse developed touch sensor & controller solutions
- › Multi-touch, water, glove & EMC tuning
- › Customized glasses & inhouse optical bonding
- › Enhancement with haptics, force, gesture control etc.

Discover our OEM Solutions for high performance gaming experiences

We offer our customers extensive market and product knowledge and advise on special product design requirements such as enclosure materials, temperature, humidity or vandalism protection. We also offer technical support during the product qualification and approval process and take care of document (PCN, EOL) and obsolescence management.

Glass Variations

- > Standard and customer-specific glasses
- > Various printing, hardening & surface treatment methods
- > Float glass, high ion, exchange glass, plastic, etc.

Housing Concepts

- > Open frame and floating-mount monitors for easy integration in cabinets
- > Stand alone monitors for wall and ceiling mount
- > Monitors with customized plastic housing
- > LED framed monitors
- > IP and vandalism protection

Lighting Concepts

- > Integration of intelligent LED stripes with homogenous lighting in customized housing
- > DATA MODUL LED PCBA design
- > Inhouse developed control software for individual LED lighting settings

Qualification & Certification

- > Safety IEC/EN 62368-1
- > CB report and certification
- > EMC/EMI
- > MET certification
- > UL certification

Additional Features

- > Accessories such as power supplies, cables etc.
- > Proximity & Ambient Light Sensor
- > Artificial Intelligence (AI)
- > NFC / Bluetooth
- > Audio & camera integration
- > Barcode scanner
- > Haptic feedback
- > Knob on display
- > Inductive charging lay

Button Deck Monitor Proof of Concept

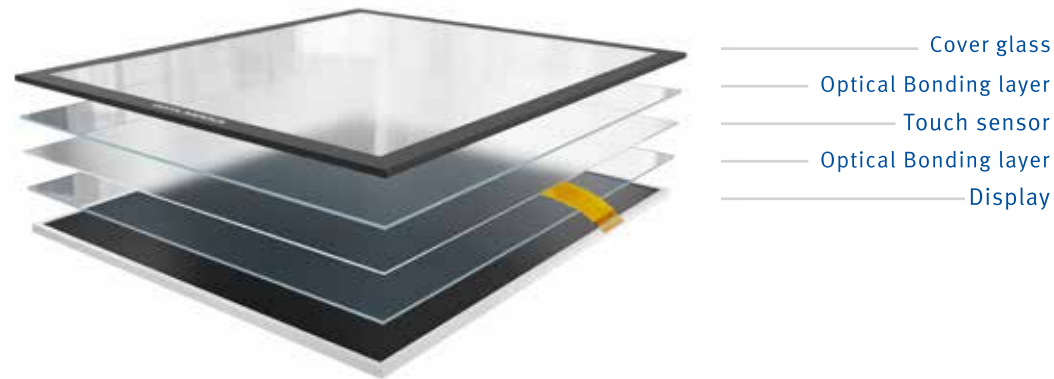

Product Features

- > 19.1" stretched panel with 1920x360 resolution
- > PCAP sensor (DATA MODUL design)
- > Cover glass 5mm
- > Translucent print for LED lighting concept & function symbols
- > eMotion LCD controller board (DP, DVI)
- > DATA MODUL controller board for intelligent LEDs
- > Inductive charger

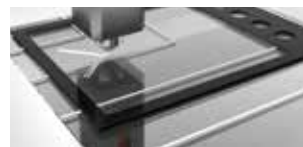

All Bonding Technologies from one source

In our international production facilities, we apply decades of bonding expertise. We provide state-of-the-art OCA, LOCA, air, gel and hybrid bonding processes and can thus offer customized touch display solutions directly from a single source. Clean room, production and development capacities of several thousand square meters allow us to act quickly and flexibly and to manufacture products at the highest quality level.

Optical Bonding

Depending on the components, the prevailing environmental conditions and the scope of the project, we select the appropriate optical bonding process. All processes are carried out inhouse and under cleanroom conditions.

LOCA / OCR

- > Liquid adhesion
- > Can be used for cover glass, glass-based sensor & display

Hybrid bonding

- > Liquid adhesion with slit coating
- > Optimised for high volume projects

OCA

- > Pressure-sensitive adhesive
- > Can be used for foil sensors, optical filters on the cover glass

Air gap

- > Double-sided industrial adhesive tape in the form of strips
- > Applicable for resistive / PCAP touch on display

Structural Bonding

For the bonding of housings with cover glass, touch units or touch displays, we rely on advanced fully automated manufacturing methods. These methods are called structural bonding and ensure an efficient and precise connection.

Pick & place

- > Camera-based assembly of cover glass / touch units with housings or displays

Gap filling

- > Measurement & filling of the gap between the housing & the cover glass / touch unit

Hot melt

- > Bonding of housing with cover glass / touch units by means of reactive polyurethane

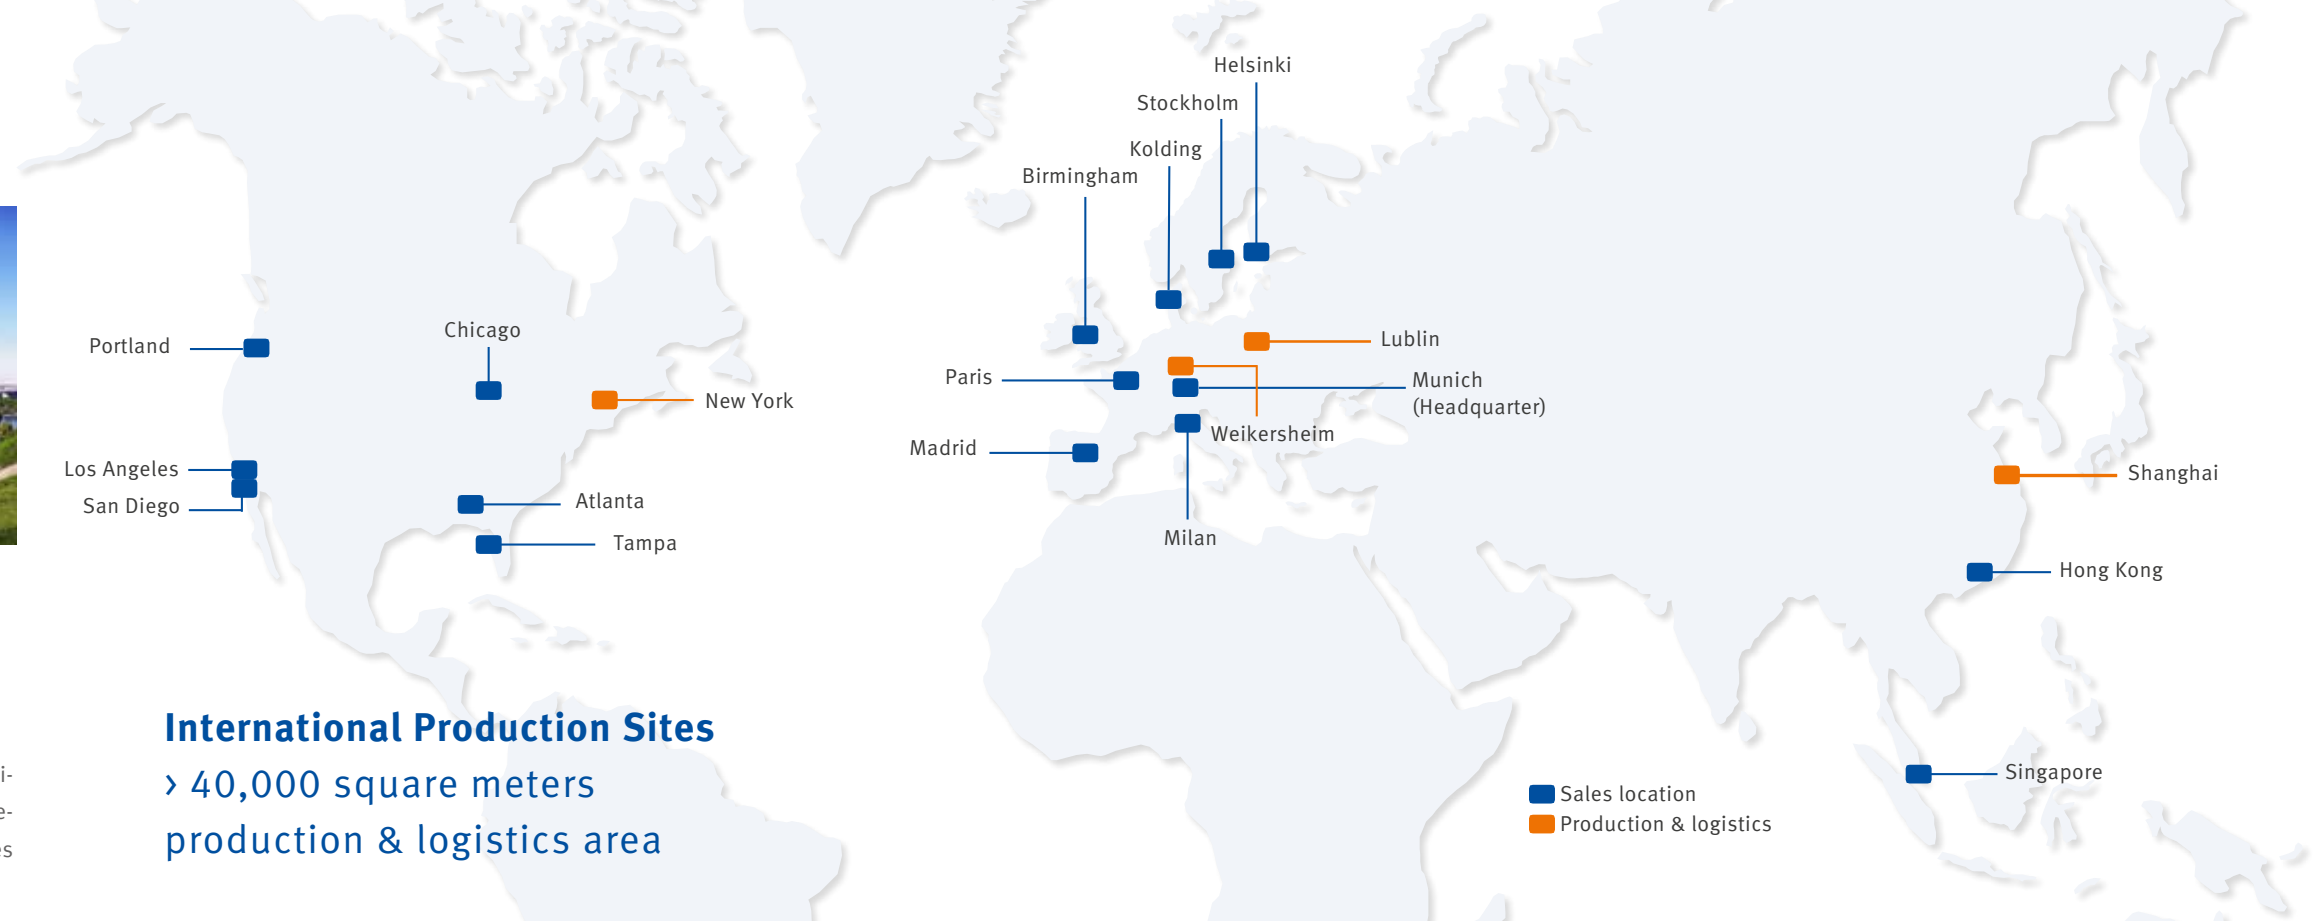

Local for Local – Why choose DATA MODUL as your supplier?

Since our founding in Munich in 1972, we deal with the fascination of displays and are represented worldwide with several production and logistics locations as well as sales offices in promising growth markets.

In our 50 years of existence, we have specialized in different market requirements and meet the high quality demands with various certifications. The basis for this is provided by an interplay of distribution components, in-house developments, our own production and worldwide logistics concepts in order to supply our customers in a cost-efficient and timely manner.

At DATA MODUL, 600 employees put their heart and soul into bringing visual communication between human and machine to the next level. Thanks to a good infrastructure throughout the USA, we offer our customers an all-round service consisting of consulting, development, prototyping, bonding technologies, quality management, series production, logistics and application service on-site.

International Production Sites > 40,000 square meters production & logistics area

Weikersheim (Germany)

In the middle of Germany, our technology flagship awaits with a total area of more than 23,000 square meters. Here, we combine flexible production lines, state-of-the-art manufacturing islands, prefabrication, mechanics, logistics and prototype construction as well as all bonding technologies at one location. In Weikersheim, we employ around 200 people.

Hauppauge (USA)

From concept to design and prototyping to production and certification: With our subsidiary DATA MODUL Inc., close to New York City, and widespread Sales office all over the US, we follow our "local for local" philosophy to provide system engineering and high-quality support on-site. For more than 25 years, DATA MODUL Inc., we stand as your one stop solution provider.

Lublin (Poland)

Extended bonding capabilities and lean logistics processes: In 2019, we opened our latest DATA MODUL production site in Lublin, Poland, equipped with state-of-the-art machinery. On around 14,000 square meters, our 150 employees manufacture according to German quality standards. This strengthens our position as Europe's market leader.

Shanghai (China)

Local assembly according to German quality standards on a total area of around 2,000 square meters in Shanghai: Also our production site in China follows our high-quality approach and enables us to serve the needs of local markets and our globally operating customers based in Asia efficiently and quickly. In China, we are proud to count 25 talents to our team.
