

# DATA MODUL announces availability of LED circular displays

Munich, 18 September 2024

DATA MODUL is pleased to announce the latest release of its display portfolio: LED circular display solutions. This new product solution has been designed to offer exceptional performance and flexibility in a range of applications including gaming machines, casinos, retail environments and event exhibitions to elevate tech savvy image and boost foot traffic.

The round LED display features advanced direct-view LED technology, which offers a lifespan of over 100,000 hours and low power consumption. These accomplishments ensure longevity and a significant reduction in maintenance and operating costs.

With a brightness of < 700 nits, a contrast ratio of 3000:1 and a refresh rate of 3840 Hz, the display delivers clear and vivid contents. The operating temperature range of -20 to 40 °C enables reliable performance in various environments.

The display is highly customisable and can be adjusted in size, shape and resolution to meet specific requirements. It also features optional dynamic RGB ambient lighting that enhances the visual experience and increases engagement. Maintenance is facilitated by front and rear access and the integrated controller ensures ease of use.
