

DATA MODUL and Plan International: Working together for a better future

Munich, 18 December 2024

Giving people the chance of a better life: This year, DATA MODUL is continuing its social commitment and supporting the valuable work of Plan International. With a donation of 5,000 euros to the emergency relief fund of the children's rights organisation, DATA MODUL is committed this year to providing fast and effective help for children and families in crisis situations. Together with Plan International, the Munich-based tech company is pursuing the long-term goal of supporting specific projects that create sustainable prospects for girls and boys and strengthen equal opportunities.

The partnership between DATA MODUL and Plan International has been in place since December 2022 and has already made significant progress for children in need during this period. One example of this is the 'Prevent malnutrition! Phase II' project in Cambodia, which DATA MODUL supported in December 2022 with an initial donation of 5,000 euros. The project measures implemented in the period from November 2020 to December 2023 achieved impressive results:

- **Early childhood development:** Over 1,700 parents and carers took part in training courses on healthy nutrition and early childhood development.
- **Education infrastructure:** The construction of 25 new preschools and the renovation of existing facilities created better learning environments for children.
- **Health and hygiene:** Around 4,763 children received medical check-ups, while access to clean water and improved sanitary facilities in 3,000 households significantly improved living conditions.

Beate Junker, CFO of DATA MODUL, emphasises: 'It is very important to us to take responsibility and it fills us with pride that we were able to make a small contribution to improving the living conditions of children and their families with our donations. The results in Cambodia show how much we can achieve together. With our current donation to the emergency relief fund, we would like to send a further signal of solidarity and unbureaucratic help. The fund makes it possible to provide urgently needed goods in acute emergency situations such as natural disasters or conflicts – from drinking water and food to hygiene articles and emergency shelters. Together with Plan International, we want to continue to work for positive change in the future and offer children a perspective for tomorrow.'

About DATA MODUL

As a passionate enabler, DATA MODUL AG does everything in its power to turn customers' visions into reality. With a comprehensive understanding of hardware, software and services as a harmonious unit, the focus is on developing customised display solutions that precisely meet the specific needs and objectives of the customer. The outstanding core competence of DATA MODUL AG lies in customising, whereby the company not only provides products, but rather tailor-made solutions with a clear market focus. With over 50 years of experience, DATA MODUL AG represents financial stability, innovative strength and international growth. Its presence at more than 20 locations worldwide and a total area of around 40,000 square metres for production, logistics and administration enables the company to respond flexibly to global challenges.
